On 24 February, Centralines will celebrate achieving its longest every period of no Lost Time Injuries (LTI's).

The team has achieved a LTI free period of two years, which far exceeds their previous best of 425 days.

Trevor Hansen, Area Manager of Centralines credits this achievement to always putting safety first, and that even includes the monthly team meeting agenda, where safety is the first item up for discussion.

The Centralines team have a dedication to safety, not only while they are on the job, but also outside of work, where their safety conscious attitude extends to their home and their families; keeping the people most important to us safe.
