<sup>1</sup> DG - Distributed Generation, where a method of electricity generation is connected and electricity is exported back into the Centralines' network

<sup>2</sup>The no. of consumers are those estimated who will pay a particular price during the 2024-25 year.

### Notes

- All price categories, with the exception of U01, include a fixed daily charge and one or more variable charges. The variable charges that apply to a connection are dictated by the type of meter and metering configuration.
- Day (CTUD) is the period between the hours of 7am to 11pm and Night (NITE) is between 11pm and 7am.
- On Peak variable consumption (ONPK) is measured during the periods 7am to 11am and 5pm to 9pm every day.
- On Peak Demand (OPD), Summer or Winter, is the kW's delivered over the half hour period of maximum consumption between the hours of 7am and 11am, and 5pm and 9pm on a working day.
- Summer is the period 1 October to 30 April, Winter is the period 1 May to 30 September.
- Anytime Maximum Demand (AMD) is the kW's delivered over the half hour period of maximum consumption during the month to which the charges apply.
- The kVAR amount represents twice the largest difference between the kVArh amount recorded in any one half hour period and one third of the kWh recorded in the same half hour period. The charge is applicable only during week days, between 7am and 8pm.
- All prices as stated are GST exclusive.
- Centralines will pay a posted discount of \$0.02 c/kWh to all eligible consumers registered on our network as at 31 March 2025. The discount will be calculated using 12 months of consumption data from 1 April 2024, and is scheduled to be paid to consumers via their retailer in the month of May 2025. The minimum discount payable to any consumer is \$5, and the maximum is \$5,850.
